## Work Experience

### MYC India Education Pvt. Ltd.

March 2023 - Present (Front-End Developer)

## Projects

### Paradigm24

<https://www.paradigm24.com>

May 2023 - Present

I'm working on a project where I'm converting all the Adobe XD designs into HTML, CSS, and JavaScript web templates. I'm also updating the old designs for different user profiles, like the admin dashboard, user interface, and premium user themes, to give them a fresh, modern look. I'm using Chart.js and Canvas to create interactive graphics for report analysis, making the data more visually appealing and easier to understand.

## MYCIndia

March 2023 - Present

<https://www.mycindia.com/>

At MYC India, a trusted partner in guiding students toward their educational aspirations, I specialize in creating visually compelling and user-friendly web experiences. Leveraging advanced front-end technologies, I design and develop responsive landing pages and various web components that enhance user engagement. My role involves closely collaborating with teams to ensure smooth admission processes and simplifying visa procedures, all while maintaining a focus on delivering high-quality digital solutions.

## E2mentor

Aug 2023 -Dec 2023

<https://www.e2mentor.com>

As a Front-End Developer, I successfully collaborated with a backend developer to create a robust web application using the Angular framework. The project involved integrating APIs provided by the backend developer to fetch and manipulate data, ensuring seamless interaction between the frontend and the Backends. The application featured three distinct login systems: Teacher, Student, and Admin, each with unique user interfaces and functionalities.

**Angular | Material UI | PrimeNG | jQuery | TypeScript | Chart JS**
